

Building across software, operations, and skilled work.

A concise public résumé. Editable working files remain private.

CURRENT	Founder, Evident Technologies LLC Developing evidence-conscious software systems and supporting the public presentation of the company's flagship product, Evident ICU.
PRODUCT WORK	Evident ICU Work focused on preservation boundaries, chronology, review, integrity verification, and source-to-output traceability. The product is in private beta and does not provide legal advice.
PRACTICE	Software and systems engineering Web interfaces, domain stewardship, testing, documentation, and reviewable delivery.
GROUNDING	Trades, hospitality, and operations Hands-on work that developed an emphasis on practical sequence, maintainability, clear handoffs, and systems that account for actual working conditions.

Working strengths

- Tracing an unclear system before changing it.
- Separating public, private, generated, and historical sources.
- Translating complex workflows into direct interfaces and documentation.
- Building verification and a clear path back into delivery.
- Communicating limitations without obscuring the useful work.

The public résumé is available as a PDF. Editable source files remain private.
